Install Drayton controls to ensure your Boiler Plus compliance

April 2018 will bring updates to Part L of the Domestic Building Services Compliance Guide with the aim of improving efficiency and cutting heating bills for homeowners in England.

What this means for you

- All new installs and replacements of components installed in existing systems need to be fitted with time and temperature controls.
- The new boiler, will also need to meet a minimum requirement of 92% ErP.
- If the installation is a combi boiler there are some additional measures that need meeting. You'll need to select one of the following:
  - Flue gas heat recovery
  - Load compensation
  - Weather compensation
  - Smart heating controls

Drayton controls to meet Boiler Plus requirements for a combi install*

When installing a combi boiler	When controlling a combi boiler, you need to fit a set of controls which improve energy efficiency
BOILER PLUS COMPLIANT PRODUCTS	Digistat+/+RF **or** Digistat+1/+1RF **with** SM1 / SM2 **or** LP range Clip-in controls range Digistat+2 or Digistat+3 range Wiser Multi-zone or Thermostat Kits

Drayton controls to meet Boiler Plus requirements for a non-combi (system boiler) install

When installing a non-combi boiler	When controlling a non-combi boiler, you need to fit time and temperature controls
BOILER PLUS COMPLIANT PRODUCTS	RTS range **or** Digistat+/+RF **or** Digistat+1/+1RF **with** SM1 / SM2 **or** LP range Clip-in controls range Digistat+2 or Digistat+3 range Wiser Multi-zone or Thermostat Kits

The Drayton range of products offers a solution for both combi and non-combi boiler installations, meaning you can continue to fit the thermostats and time controls you know and love, safe in the knowledge that your installation will meet with the new Building Regulations.

*If FGHR or weather compensation are fitted with a combi-boiler, then ANY of the controls in our entire range (listed above) would be suitable for the installation.
