**Important Note: Traditional cast iron radiators will come in a cream primer please be aware that primer is not a finished surface. These radiators must then be finished with a paint suitable for radiators. When painting your radiators topcoats and undercoats must NEVER be WATER BASED or EMULSION. Be careful in selecting undercoats as some modern formulations are water based even though they are intended for use with oil based topcoats. Water based paint may create rust pockets that will develop and become unsightly.**

There are two types of element you can use with your towel rail; manual electric element and thermostatic electric element. Use a T-Piece to enable the towel rail to be dual fuel - electric and hot water/

Chrome Round Head Manual Electric Element

The manual electric element has basic functionality, it maintains a constant heat and is either on or off. Control is via a switched fused spur, the neon light indicates if the element is on.

Chrome Round Thermostatic Electric Element

The thermostatic electric element monitors the temperature of the towel rail and activates the element as required. It has a range of set temperature options which can be selected manually.

How to choose your Element

It is important to select the correct size element for your towel rail. Too small and it will not provide enough heat, too large and it can burn out.

The chart opposite will help you choose the right size element; we have listed the towel rail output in watts and the corresponding recommended size of element.

Towel Rail output range in Watts	Electric Elements
165 - 255	200w
260 - 375	300w
380 - 530	400w
535 - 735	600w
740 - 920	800w

# SPECIAL FINISHES

We are now able to offer 5 Special Finishes for all radiators and towel rails that are currently available in RAL colours.

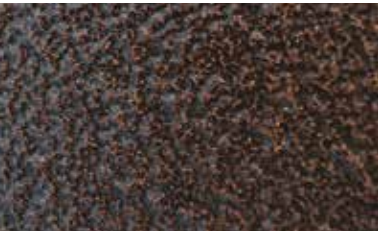

Carbon, Gun Metal Grey, Mottled Copper, Mottled Silver & Textured Matt Black are available for delivery in up to 15 working days.

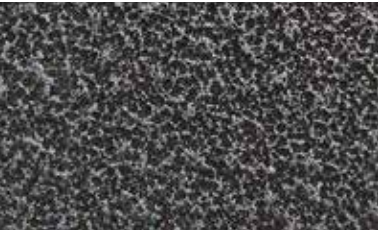

**Carbon**  
A softly textured matt finish, this dark tone is one of our most popular colours. With the growing trend for dark matt greys and black for both walls and now taps and fittings, Carbon is the perfect complement.

**Gun Metal Grey**  
This dark grey satin finish is a perennial favourite. With a fine dusting of silver that creates a subtle detailing.

**Mottled Copper**  
The first of our two mottled effects, the copper and black tones are perfect for a more traditional look, the mottled effect produces a hammered textured finish. The colours combine to give a fine two-tone finish that works particularly well on CORNEL multi column.

**Mottled Silver**  
The second mottled finish, can work well in both contemporary or traditional schemes. The silver and black combination produces a more industrial hammered finish.

**Textured Matt Black**  
A matt finish with a stippled texture that is less pronounced than the mottled effect above.

Please note: Due to the printing process and manufacturing tolerances the colour of a finished radiator may vary slightly from the colours represented in this brochure. It should also be noted that the final finished colour of radiators ordered in the same colour but at different times may vary due to production processes.
