

# Taps and Showers

2019

**Roca**

# Pictograms

The following pictograms are used throughout the brochure to help you identify the key features of our products

## Brassware

**EverShine®**  
Roca's innovative EverShine® chrome plating system involves an electrolytic coating, producing a hard-wearing finish on all taps and showers. It helps maintain the shine, making cleaning easier.

**SofTurn®**  
SofTurn® Cartridge Technology gives the user precise control over water flow and temperature.

**ECO disc cartridge**  
This Roca exclusive technology helps to save water and energy. As the tap handle is raised, a slight resistance is reached at 50% of the water flow; lifting beyond this bite point produces a full flow. The cartridge has a temperature limiter which can be set at installation to eliminate the risk of scalding. The temperature limiter can be altered after installation.

**Flow limiter**  
Roca brassware feature a latest-generation flow limiter that permits extra water savings.

**Electronic basin mixer**  
Cutting-edge technology for electronic mixers, based on the automatic on/off, providing reliability, durability and water and energy saving.

**RocaBox Compatibility**  
Concealed shower valve housing unit designed to suit multiple built-in mixers. Compact in size, able to fit within a 70mm cavity. Compatible with manual and thermostatic mixers.

**Self-closing**  
Brassware that self-closes within a set amount of time, ideal for public spaces as it helps reduce water consumption

**Ceramic Disc Cartridge**  
Ceramic disc cartridges are hard wearing and long lasting to provide a watertight seal.

**Lifetime Guarantee**  
In accordance with our commitment to create products for you of the highest quality that stand the test of time, we are delighted to offer a lifetime guarantee against manufacturing defects on all ceramic disc cartridges.

**Cold Start**  
The flow always starts with cold water, meaning water systems are only activated when hot water is required thereby saving energy.

**Progr-Turn®**  
Taps with progressive technology always start the flow with cold water, and as you continually turn the control, the flow changes to a mix of hot and cold, meaning water systems are only activated when hot water is required thereby saving energy.

**Accessible products**  
A product specially designed for people with reduced mobility.

**WRAS**  
The Water Regulations Advisory Scheme (WRAS) specialises in certifying all products using drinking water. Throughout the brochure we have featured the details for WRAS approved products.

**Water label**  
Throughout our brochure, we have used the one-line version of the label as shown, the flow rate classification is measured at 3 bar pressure.

**Water pressure**  
Water pressure determines the flow of water from your tap or shower, this is typically measured in 'bar'. Identifying your plumbing system will help you choose the tap or shower that suits your water pressure. Throughout the brochure we have included pictograms to highlight if the product is suitable for low, medium or high pressure.

## Thermostatic

**Quick Reaction®**  
Thanks to the Quick Reaction® technology developed by Roca, our thermostatic mixers allow you to enjoy the flow and temperature you desire in less than 3 seconds, as well as keeping it constant.

**Security 38°®**  
Security 38°® is a safety device (a red button) included in our thermostatic brassware that systematically prevents the water temperature from exceeding 38°C.

**SafeTouch®**  
SafeTouch® prevents the chromed plating on thermostatic taps from becoming hot, eliminating the risk of scalding.

**ECO 50% water saving system**  
A selection of thermostatic wall-mounted products come with a green button that instantly reduces the water flow by 50%.

## Shower heads

**Easy Clean handshower**  
Anti-limescale system for handshowers for fuss-free elimination of limescale deposits, through the use of soft materials in the jets.

**Spray**  
A powerful water spray, divided up into tiny droplets that stimulate the blood vessels and give the body a revitalising massage.

**Rain**  
The fine water droplets are converted into tiny threads, giving the body a sensation of lightness and pleasure.

**Aquair**  
Water and air are combined to give a soft, foamy sensation for a truly relaxing experience.

**Pulse**  
Intermittent fine jets of parallel flowing water that give the body a revitalising massage.

# The Roca brassware story

1966

We presented our first electronic tap

2007

4.6 million bathrooms in the world have Roca taps

2016

We opened our 8th brassware factory in Turkey, enabling us to produce over 8 million pieces per year worldwide

1930

We launched our first collection of taps

1954

We opened the first Roca brassware factory

1974

The first Roca single-lever tap with a ceramic cartridge was born

Today

We have 11 factories in 4 continents, dedicated to manufacturing products of the highest quality that will stand the test of time.

## Design and Innovation

Design, innovation, sustainability and wellbeing have been the cornerstones of Roca for over a century. Founded in 1917 to produce cast-iron radiators, Roca has always responded to changing tastes and trends.

In the 1970s we set up the Roca Design Centre to fully integrate design into our manufacturing process; the following decade saw the first of our collaborations with international design icons.

## Quality

When you choose a Roca tap, you can be confident that you are investing in a quality product. We have been manufacturing our own taps for over 60 years and we constantly strive to further improve our production and quality control methods to bring you products of the highest quality.

## Guarantee

We offer a lifetime guarantee on ceramic disc cartridges and a 5 year guarantee on brassware products as standard, giving you the confidence that these taps will stand the test of time.

Lifetime Guarantee

# Taps

## Buying guide

### A product for every situation

Whether you are planning a new bathroom or renovation, we have featured a handy guide to help you select the right products to suit your needs.

#### BASIN TAPS

##### SINGLE-LEVER MIXER TAPS

Single-lever mixer taps allow you to use just one lever to control the water flow and temperature. You move the lever up and down to turn the water flow on and off, turn the lever from side to side to gradually change the water temperature. See pages 18-95.

##### EXTENDED HEIGHT TAPS

Providing the most comfortable solution for your basin type. Extended height basin taps have been designed to suit on countertop basins. See pages 18-95.

##### WALL-MOUNTED

Wall-mounted basin taps are mounted onto a wall, creating a focal point for your basin. See pages 18-95.

##### DUAL CONTROL TAPS

Dual control taps feature two separate control handles to adjust the water flow and temperature. See pages 96-111.

##### ELECTRONIC TAPS

Electronic taps feature a new-generation "Intelligent System" based on a contact-free operation. A motion detector instantly turns the tap on and off, without wasting a single drop of water. See pages 114-117.

##### PILLAR TAPS

Pillar taps suit basins with two tap holes. These are two individual tap handles that control the hot and cold water supply to a basin. See pages 108-111.

##### SELF-CLOSING TAPS

Self-closing taps turn on the water flow, by applying pressure on the control button, the flow of water automatically stops after a short period of time, which avoids wasting water and energy. Ideal for use in commercial spaces. See pages 112-113.

# Showering and Bath filling buying guide

## SHOWERING

### WALL-MOUNTED MIXERS

Wall-mounted mixers are installed onto the wall, without the need of concealing the mixer behind the wall. There are manual and thermostatically controlled options available as shower or bath-shower mixer types.  
See pages 126-141.

### BUILT-IN MIXERS

A built-in mixer is a concealed mixer which is installed behind the wall, leaving the control panel exposed on the wall. Manual and thermostatically controlled mixers are available with different outlet options.  
See pages 142-173.

### SHOWER COLUMNS

Fitted onto the wall, shower columns include a overhead showerhead, adjustable riser rail and handset. Luxury Hydromassage shower columns offer upper and lower body jets, an overhead shower and handset.  
See pages 182-189.

## BATH FILLING

### WALL-MOUNTED MIXERS

Wall-mounted mixers are mounted onto the wall, most mixers provide a bath and shower solution in one. There are manual and thermostatically controlled options available.  
See pages 126-141.

### BUILT-IN MIXERS

A built-in mixer is a concealed mixer which is installed behind the wall, leaving the control panel exposed on the wall. Manual and thermostatically controlled mixers are available with different outlet options.  
See pages 142-173.

### DECK-MOUNTED MIXERS

Deck-mounted mixers are designed to be mounted directly onto a bath, 2,3 and 4 hole styles are available, providing solutions for any bathroom space.  
See pages 174-179.

### FLOORSTANDING MIXERS

Floorstanding mixers are fitted to the floor, creating a focal point in the bathroom.  
See pages 180-181.

### BATH SPOUTS

Wall-mounted bath spouts are perfect for filling the bath, the spout is installed directly onto a wall and operated by a separate built-in mixer.  
See pages 27, 43 and 57.

### OVERFLOW BATH FILLER & WASTE

Contemporary and simple to use, a bath filler, overflow and waste combination can be installed directly onto the bath and fitted where the overflow and waste is located, saving space without the need for a separate bath filler.  
See page 197.

### PILLAR TAPS

Pillar taps suit baths with two tap holes. These are two individual tap handles that control the hot and cold water supply to a bath.  
See pages 108-111.

# Roca / A world of innovation

## BRASSWARE FEATURES

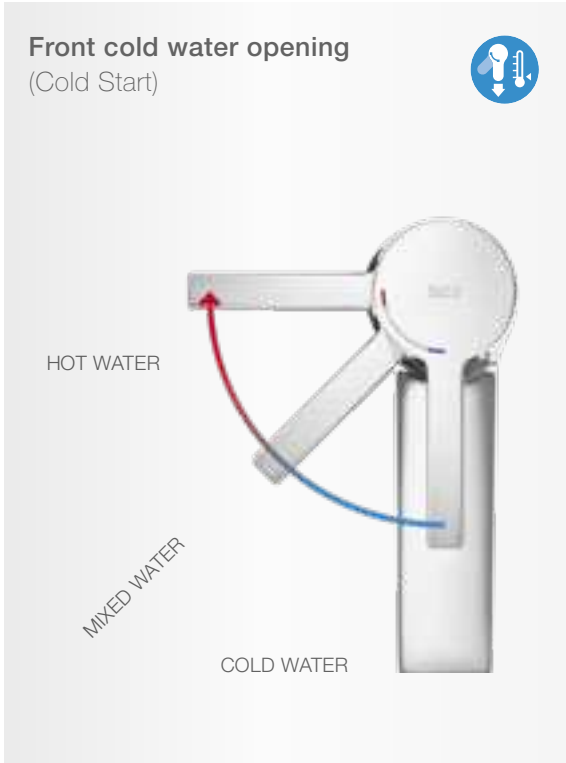

When it comes to choosing the most suitable taps and showers, finding a model that adjusts to your taste and requirements will be a very easy task from the wide selection available.

Roca constantly fine-tunes its approach to design and technology to stay at the forefront of bathroom innovation.

The key features and benefits of our products reflect the world we live in and the changing demands of our customers.

## SAVE WATER AND ENERGY

Roca's innovative **Cold Start** system, which prevents unnecessary energy consumption, by only activating the boiler when the handle is turned to hot. Saving energy and reducing household bills.

## DIFFERENT HEIGHTS

Choose from a range of different basin mixer heights, each designed to provide the most comfortable solution for your basin type. Compact basin mixers are designed with reduced heights, ideal for bathrooms with compact spaces. **Standard height basin mixers** complement wall-hung and vanity basins, **Medium height basin mixers** pair perfectly with in-countertop basins, **Medium plus** and **Extended height basin mixers** have been designed to suit on-countertop basins.

## EASY CLEAN

Easy clean prevents limescale deposits on handshowers, through the use of soft materials in the handset jets.

## SMOOTH BODY BASIN MIXERS

Smooth body basin mixers are available in the majority of the brassware collections, meaning there are no unsightly holes at the back of the basin mixer, providing a distinct and modern look.

## DURABILITY

Roca's exclusive designed cartridge is tested for over 1 million movements, giving you the confidence that our taps will stand the test of time.

## SOFTURN® TECHNOLOGY

Roca have equipped the cartridges with **SofTurn®** technology, so that you can achieve the highest levels of control, precision and comfort when selecting your desired water flow and temperature.

## EASY TO CLEAN

The beauty of the hard-wearing chrome-plated finish of Roca taps is thanks to the innovative **EverShine®** system which involves an electrolytic coating. This guarantees that each tap will continue to shine over the years, making cleaning easier.

## INTELLIGENT TAPS

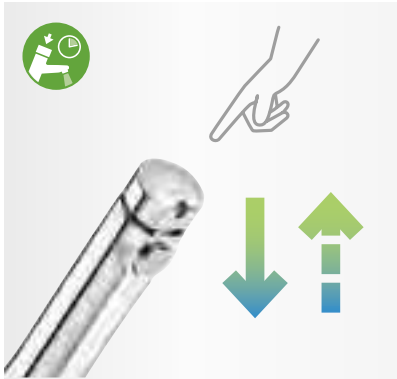

L90, M3-E, Loft and L20 **electronic taps** feature a new-generation "Intelligent System" based on a contact-free operation. A motion detector instantly turns the tap on and off, without wasting a single drop of water providing reliability, durability and significant water and energy savings. Suitable for public spaces.

BRASSWARE FEATURES

SELF-CLOSING

The Avant collection features self-closing pieces. Intuitive and easy to use the mixers are operated by applying pressure on the control button, the water flow will automatically stop after a short period of time, saving water and in turn money.

Avant self closing tap

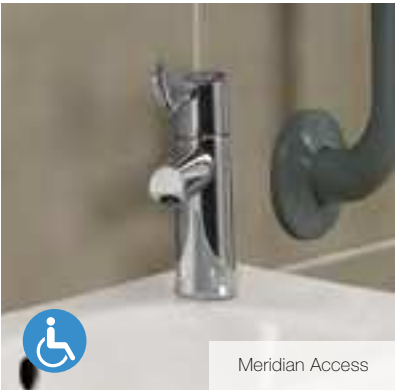

FLOW LIMITERS

Roca taps feature the latest generation flow limiters that give extra water savings by restricting the flow to a specified maximum number of litres per minute. Flow limiters can reduce water consumption by up to 65%.

ECO 50%  
WATER-SAVING SYSTEM

An exclusive technology developed by Roca for its taps to save water and energy. Our exclusive **ECO disc cartridge** featured in the majority of taps, helps to directly limit the flow of water, as the tap handle is raised, a slight resistance is reached at 50% of the water flow; lifting beyond this bite point produces a full flow. The cartridge has a temperature limiter which can be set at installation to eliminate the risk of scalding.

Meridian Access

ACCESSIBILITY

Choose from a selection of products designed with larger levers to facilitate its use, providing comfort whilst enhancing your bathroom space.

THERMOSTATIC SOLUTIONS FOR EVERY BATHROOM

Our thermostatic mixers provide total water control thanks to the exclusive,innovative technologies they incorporate. They quickly reach the desired temperature, avoiding excessive temperatures and reducing the amount of water used.

T 1000 Bath-shower mixer

SAFETOUCH®

The latest innovations in materials have allowed Roca to develop its **SafeTouch®** technology. **SafeTouch®** stops the chromed bodies of Roca thermostatic taps from becoming hot, eliminating the risk of scalding.

SECURITY 38°®

The **Security 38°®** system is a safety device included in Roca's thermostatic mixers (a red button) that prevents the water temperature from exceeding 38° to avoid scalding, providing a safe and comfortable bathing experience.

50% ECO WATER SAVING

Roca's thermostatic taps are equipped with a flow limiter button that offers instantaneous water savings by reducing the flow to 50%, unless the button is pressed which allows the control to then increase the flow.

QUICK REACTION®

Set your mixer to enjoy the temperature you want, quickly and continuously, without fluctuations. Thanks to the **Quick Reaction®** technology developed by Roca, our thermostatic mixers allow you to enjoy the flow and temperature you desire in less than 3 seconds, as well as keeping it constant.

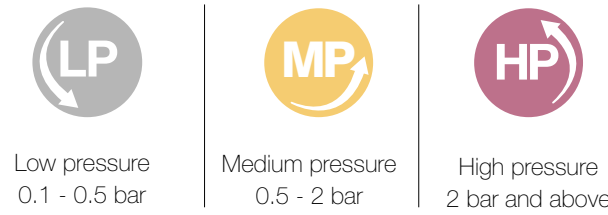

Water pressure guide

The information in this section is intended as a guide to help you decide on the best products for you. It is not intended to be a substitute for guidance from bathroom professionals, so it is always wise to check that the products you like are suitable for your installation.

To help you select the brassware that provides the best water flow performance for your home, it is recommended that you take into consideration the water pressure of your plumbing system

Water pressure determines the flow of water from your tap or shower, this is typically measured in 'bar'. Identifying your plumbing system will help you choose the tap or shower that suits your water pressure.

Throughout the brochure we have included pictograms to highlight if the product is suitable for low, medium or high pressure. Below is a diagram to explain the recommended bar pressure required for each level. In low pressure situations the flow rate can be improved if desired, by fitting the tap with a flow straightener.

Different types of water systems

There are three main types of domestic water systems available:

Gravity fed

In most gravity fed systems, a cold water storage tank is installed in the loft.

The natural pull of gravity carries this water down to the hot water cylinder which is generally in an airing cupboard.

This type of system is considered as low pressure.

Combination boiler

These are pressurised systems, which are typically known as combination (combi) boilers, where the cold water is directly mains fed, delivering hot water almost instantly.

This type of system is considered as medium to high pressure.

Pressurised

In a pressurised system an unvented cylinder will store pressurised hot water, ensuring a strong flow of hot water when you turn a tap on in the home, regardless of where it is located. The cylinder will typically be located in the airing cupboard.

This type of system is considered as high pressure.

European water label scheme

Many of our products are registered with the Water Label scheme. The scheme identifies water saving products, that when installed and used correctly, will use less water, saving energy and money. The Water Label is used across Europe for most bathroom products.

Throughout our brochure, we have used the one-line version of the label as shown above, the flow rate classification is measured at 3 bar pressure.

The Water Regulations Advisory Scheme (WRAS) specialises in certifying all products using drinking water. Throughout the brochure we have featured the details for WRAS approved products.

Type of measurement:

Performance bands

Actual capacity or performance of the product

Making your selection easy

Throughout the brochure we have provided the essential information you need to take into account when selecting the right brassware for your dream bathroom.

Basin mixers

Monobloc basin mixer with retractable chain connector, aerator, 5 l/min flow limiter and 3/8" flexible supply hoses

Ref. 5A3J09C00  
£93.74 (£112.49)

Monobloc basin mixer with 5 l/min flow limiter, smooth body, 1/2" flexible supply hoses and flow straightener

Ref. 5A3209C0R  
£93.74 (£112.49)

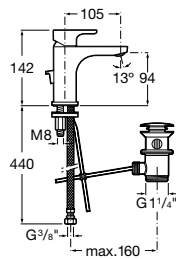

Recommended:  
Standard press down waste  
Ref. D50010005  
£16.37 (£19.64)

Due to the cold start system, the handle of these products turns 110° to the left only so may not be compatible with basins where the taphole is situated in the back right corner.

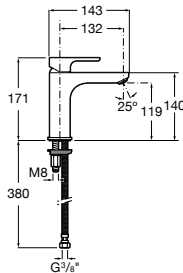

Monobloc basin mixer with 5 l/min flow limiter, aerator, pop-up waste and 3/8" flexible supply hoses

Ref. 5A3I09C00  
£103.25 (£123.90)

Medium height monobloc basin mixer with smooth body, aerator, 5 l/min flow limiter and 3/8" flexible supply hoses

Ref. 5A3B09C00  
£122.50 (£147.00)

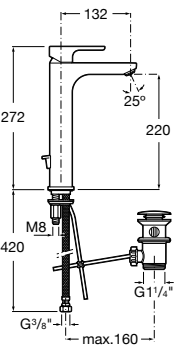

Recommended:  
Standard press down waste  
Ref. D50010005  
£16.37 (£19.64)

Due to the cold start system, the handle of these products turns 110° to the left only so may not be compatible with basins where the taphole is situated in the back right corner.

Extended monobloc basin mixer with 5 l/min flow limiter, aerator, pop-up waste and 3/8" flexible supply hoses

Ref. 5A3C09C00  
£241.25 (£289.50)

Due to the cold start system, the handle of these products turns 110° to the left only so may not be compatible with basins where the taphole is situated in the back right corner.

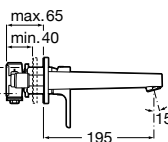

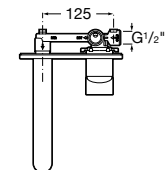

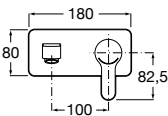

Wall mounted Basin mixer

Wall mounted basin mixer

Ref. 5A3L09C00  
£272.95 (£327.54)

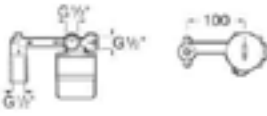

RocaBox

RocaBox is required for installation with wall-mounted basin mixer

Ref. 525220603  
£96.76 (£116.11)

Electronic basin mixers

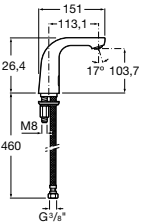

Electronic monobloc basin mixer (single water supply) with flexible supply hose, powered by 4 alkaline AA batteries (1.5 V LRG)

Ref. 5A5609C00  
£283.22 (£339.86)

Electronic monobloc basin mixer (single water supply) with flexible supply hose, powered by 230V mains connection. Includes power supply.

Ref. 5A5709C00  
£311.54 (£373.85)

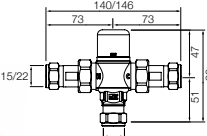

Recommended:  
Standard press down waste  
Ref. D50010005  
£16.37 (£19.64)

Optional: Thermostatic mixing valve (TMV)

Ref. 001224567  
£91.90 (£110.28)

Note: To achieve a pre-set water temperature, a thermostatic mixing valve is required to mix the hot and cold water supplies. WRAS approval is only applicable to the thermostatic mixing valve.

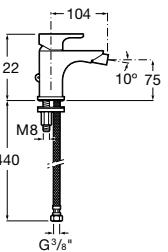

Bidet mixers

Monobloc bidet mixer with 8 l/min flow limiter, swivel flow regulator, and 3/8" flexible supply hoses

Self-close (non-concussive) basin mixer, single temperature, 1/2" connection and 3 l/min flow limiter

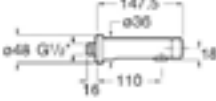

Ref. 5A4279C00  
£339.86 (£407.83)

To achieve a pre-set water temperature, a thermostatic mixing valve (TMV) is required to mix the hot and cold water supplies.

MP

HP

3.0 l/min

Wall-mounted self-closing (non-concussive) basin mixer with single temperature, 1/2" connection and 3 l/min flow limiter

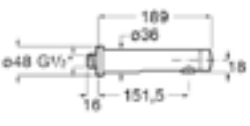

Ref. 5A7879C00  
£362.52 (£435.02)

To achieve a pre-set water temperature, a thermostatic mixing valve (TMV) is required to mix the hot and cold water supplies.

MP

HP

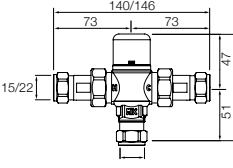

3.0 l/min

Wall-mounted self-closing (non-concussive) basin mixer with extended spout, single temperature, 1/2" connection and 3 l/min flow limiter

Ref. 5A7979C00  
£396.51 (£475.81)

To achieve a pre-set water temperature, a thermostatic mixing valve (TMV) is required to mix the hot and cold water supplies.

Optional: Thermostatic mixing valve (TMV)

Ref. 001224567  
£91.90 (£110.28)

Note: To achieve a pre-set water temperature, a thermostatic mixing valve is required to mix the hot and cold water supplies. WRAS approval is only applicable to the thermostatic mixing valve.

# Electronic Collections

M3

Electronic basin mixers

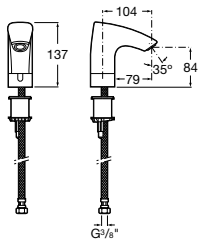

Our electronic taps feature a new-generation “Intelligent System” based on a contact-free operation.A motion detector instantly turns the tap on and off, without wasting a single drop of water.

This means reliability, durability and very significant water and energy savings. They are especially suited to public or semi-public spaces, where their saving ability is multiplied.

## Electronic basin mixers

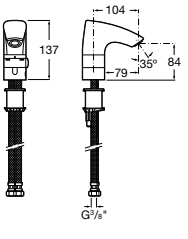

### M3 Electronic basin mixers

Electronic monobloc basin mixer (single water supply) with flexible supply hose.  
Powered by 4 AA alkaline batteries (1.5V LRG).

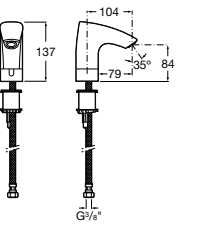

**Ref. 5A5602C00**  
**£555.11 (£666.13)**

A thermostatic mixing valve is recommended

Electronic monobloc basin mixer with external temperature control and flexible supply connections.  
Powered by 4 AA alkaline batteries (1.5V LRG)

**Ref. 5A5302C00**  
**£582.87 (£699.44)**

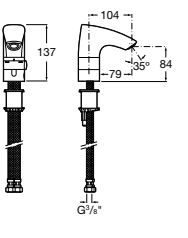

Electronic monobloc basin mixer (single water supply) with flexible supply hose.  
Mains operated at 230 V. Includes power supply

**Ref. 5A5702C00**  
**£634.41 (£761.29)**

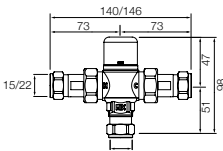

Recommended: Standard press down waste - **Ref. D50010005 £15.89 (£19.07)**

A thermostatic mixing valve is recommended

Electronic monobloc basin mixer with temperature control and flexible supply connections.  
Mains operated at 230 V. Includes power supply

**Ref. 5A5502C00**  
**£636.86 (£764.23)**

Optional: Thermostatic mixing valve (TMV)

**Ref. 001224567**  
**£91.90 (£110.28)**

Note: To achieve a pre-set water temperature, a thermostatic mixing valve is required to mix the hot and cold water supplies.  
WRAS approval is only applicable to the thermostatic mixing valve.

Dimensions in mm. Available in Chrome. Flow rates provided are tested at 3 bar pressure  
The prices shown are recommended retail prices excluding VAT (including VAT is shown in brackets)

# Showering and Bath filling Collections

# Thermostatic functions

Enjoy the water for your shower at the desired temperature and flow irrespective of variations in the water pressure. Roca's thermostatic mixers are designed for maximum safety and comfort for everyday use.

## Quick Reaction®

Quick Reaction® technology ensures that Roca thermostatic fittings reach the required flow and temperature in less than 3 seconds. Both then remain constant, irrespective of variations in water pressure.

Quick Reaction®	
Feature:	Reach your desired temperature in less than 3 seconds
Benefit:	Water and energy savings

## SafeTouch®

Development in materials has allowed Roca to develop SafeTouch® technology which prevents the chrome plating on thermostatic fittings from overheating. This eliminates the risk of scalding and is particularly beneficial in environments used by the young, the elderly and the less mobile.

SafeTouch®	
Feature:	Prevent the chrome plating on thermostatic fittings from overheating
Benefit:	Eliminating the risk of scalding

## Security 38®

A safety device (red button) that stops the control handle from being turned beyond 38°C.

Security 38®	
Feature:	Limit the temperature to 38°
Benefit:	Water and energy savings

## ECO STOP flow limiter

A selection of thermostatic wall-mounted products come with an Eco flow button that instantly reduces the water flow by 50% when selected.

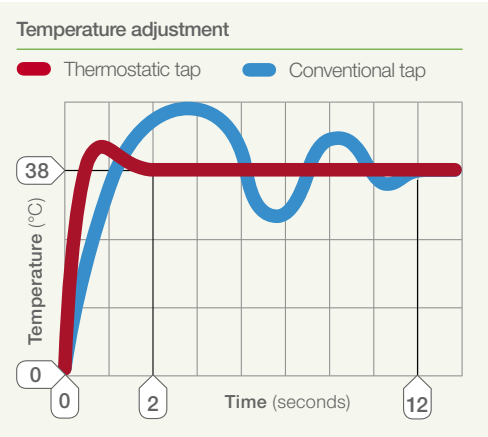

50% ECO	
Feature:	Reduce water flow by 50%
Benefit:	Water and energy savings

Flow limiter. Limit your water consumption by up to 50%. \*\*

- Environmental benefit
- Product benefit

\*\*Flow rates provided are tested at 3 bar pressure

# Create your ideal shower

Discover the wide range of products to create your ideal shower. To help you design the shower for your needs, we have highlighted below the different shower types available.

Create your showering haven in a quick and simple way by following our guide.

## 1. Choose your mixer style

**Built-in**

A concealed mixer is installed behind the wall. Choose from different outlet options:

**One outlet mixers** operate the water flow and temperature from one control.

**Two outlet mixers** have two separate controls, one dial operates the water flow through a diverter between the two outlets and the other dial controls the water temperature.

**Three, four and five outlet mixers** have separate controls operating the water flow, water temperature and diverter outlets.

Please see pages 142-149 for Built-in mixers and pages 190-205 for showering accessories. See pages 160 -173 for recommended Built-in mixer sets.

**Deck-mounted**

Deck-mounted mixers are installed onto the bath, single-lever operated mixers allow you to control the water flow and temperature using a single handle. Bath-shower mixers include a shower hose, handset, and bracket.

Please see pages 174-179 for Deck-mounted mixers.

**Wall-mounted**

Wall-mounted mixers are installed directly onto the wall, there are shower or bath-shower mixer options available. The majority of the wall-mounted mixers include a kit, comprising of a shower hose, shower handset and wall bracket.

Please see pages 126-141 for Wall-mounted mixers and pages 190 -205 for showering accessories.

**Shower columns**

Fitted onto the wall, shower columns include a overhead showerhead, adjustable riser rail and handset. Luxury Hydromassage shower columns offer upper and lower body jets, an overhead shower and handset.

Please see pages 182-189 for Shower column options.

## 2. Choose your shower type

**Manual**

Manual mixers allow you to blend the hot and cold water supply to deliver the preferred temperature. Available in Wall-mounted and Built-in mixer options.

Please see pages 126-141 for Wall-mounted mixers and pages 142-159 for Built-in mixers.

**Thermostatic**

Thermostatic mixers allow you to enjoy the water flow and temperature you require, quickly and continuously, without fluctuations. Available in Wall-mounted and Built-in mixer options.

Please see pages 126-141 for Wall-mounted mixers and pages 142-159 for Built-in mixers.

## 3. Choose your showering and bath components

Most wall-mounted and deck-mounted mixers include a shower kit. Built-in mixers do not include a kit, you will need to choose your preferred bath or showering components.

**Shower handsets**

Handheld shower handsets are available in Round and Square options. The majority of our handsets feature a simple integrated function selector, choose from different options to enhance your showering experience.

Please see pages 200-203 for further information.

**Shower heads**

Wall-mounted and ceiling-mounted showerheads are available in a variety of sizes. The easyclean system prevents limescale build-up, making cleaning easier.

Please see pages 191-195 for further information.

**Slide rails**

Slide rails feature an adjustable bracket that adapts to everyone's height.

Please see page 196 for further information.

**Bath spouts**

Wall-mounted bath spouts are installed above your bath, this would need to be used with a Built-in mixer to control the water flow and temperature.

Please see pages 27, 43 and 57 for further information.

**Bath filler, overflow & waste**

A bath filler, overflow and pop-up waste solution for the bath can be installed where the overflow and waste is located saving space without the need for a separate bath filler.

Please see page 197 for further information.

# RocaBox

## Shower valve housing unit

Roca presents RocaBox, a universal shower valve housing unit which is compatible with a variety of manual or thermostatic built-in mixers. Easy to install, compact in size and suitable for installation in stud or solid walls, RocaBox is the perfect solution for areas with limited space.

When installed, the RocaBox can be easily accessed and maintained, shower mixers can also be easily changed in future bathroom upgrades and renovations, saving time and added costs in commercial environments.

RocaBox is a housing unit only, it must be installed with compatible built-in mixers and cover plates which are sold separately.

### RocaBox

Key features and benefits

Universal - Can be used with manual or thermostatic built-in mixers, with single or dual outlets

2 outlets – Multiple combinations can be created

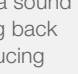

Compact – Minimum installation depth of 70mm (including stud wall measurement)

5 year guarantee

Can be installed in solid or stud walls

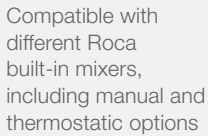

Includes a sound absorbing back plate reducing noise levels during operation

WRAS approved product

Double sealed, superior water tightness

Compatible with different Roca built-in mixers, including manual and thermostatic options

Built-in mixers

Puzzle / Built-in mixers

Enjoy the feeling of spa-like luxury with Puzzle, a complete showering solution for the contemporary bathroom or wet room.

The built-in thermostatic mixer can be paired with an overhead shower head, body jets and handset for a real statement piece. The mixers are available with 3 way, 4 way or 5 way diverters, providing various showering combinations. An overhead showerhead is available with cascade function, standard overhead shower heads are also available. Body jets can also be combined to provide a hydromassage showering experience.

Please see table below outlining the product combinations available

Built-in mixers

# Built-in thermostatic mixer sets

Create your own luxurious showering experience and enjoy relaxing, everyday of the week

Choose from a selection of Built-in mixers and combine with an adjustable slide rail that adapts to everyone’s heights, indulge your senses with a cascade shower head or emulate the natural feeling of falling rain with a shower handset. Select a combination which suits your showering needs.

To help you choose your Built-in mixer, we have carefully selected a combination of Built-in thermostatic shower and bath mixer sets, operating with 1, 2, 3 and 4 outlets.
