

THERM ACTUATORS

ACT01

Overview & Features

- The valve is closed when the actuator has no power
- The paraffin propeller is driven by heating PTC
- The actuator is silent during operation
- "In use indicator at top". When raised actuator is open
- Simple to install

Technical Specifications

- Type: Normally closed
- Initial Current: 50MA
- Working Current: 6.5MA
- Power: 2W
- IP Grade: IP54
- Stroke 4.5mm
- Maximum Load: 110N
- Supply Voltage: 230VAC
- Working Temperature: -20°C -50°C
- Storage Temperature: -20°C -50°C
- Security Level: II (double insulation)
- Cable Length: 100cm
- Dimensions: 180s (on-off) 62mm*30mm*39mm

Once installed, pull red tap to allow actuator to close port
