Because  **Vaillant** thinks ahead.

Vaillant and vSMART are registered trademarks of Vaillant GmbH

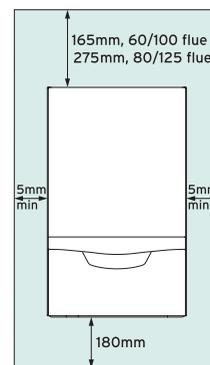

The ecoTEC plus 600 series offers quality, reliability and efficiency - the very best in home heating.

A system boiler provides central heating and hot water via a storage cylinder, which is filled from the mains and often housed in an airing cupboard.

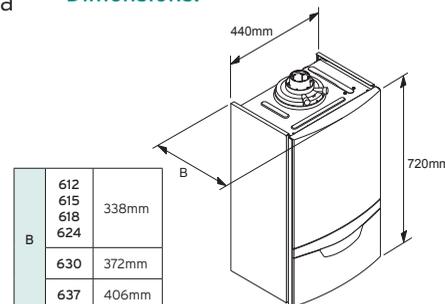

The ecoTEC plus range of system boilers is available in a wide range of output models including 12kW, 15kW, 18kW, 24kW, 30kW and 37kW, meaning that there is a suitable model for almost any home. The stylish design and small dimensions also make it a perfect fit with any home.

Clearances:

Dimensions:

Features and benefits

- Available in 12kW, 15kW, 18kW, 24kW, 30kW and 37kW outputs
- Highly efficient and economical to run with up to 89.4% efficiency rating
- Contoured case design with drop down flap to give a stylish appearance in any home
- Vaillant are the first manufacturer of heating systems with Quiet Mark accreditation
- Compact dimensions
- Engineered in Germany and manufactured in the UK
- Simple and easy to use built in control panel
- Compatible with Vaillant's complete range of intelligent controls including the new vSMART™

Useful information

- Please allow a clearance of 165mm for a 60/100 flue or 275mm for a 80/125 flue
- The installation of a Vaillant ecoTEC plus boiler typically takes between 1-2 days, however some time should be allocated for systems where radiators and pipe work need replacing

Technical specification
