COLLECTED

The bathroom should be an oasis of tranquillity, a place for pampering and a sanctuary away from the hustle and bustle of everyday living. So, switch off from the world and embrace wellness as Sofia Charalambous reveals her top tips on how to create your very own retreat :-

MIRROR, MIRROR ON THE WALL

A mirror is an effective way to transform your bathroom into a sanctuary, maximising light to emphasise a bigger, brighter space.

SUMPTUOUS SCENTS

Create a relaxing atmosphere in a spa-style bathroom with your favourite aroma. Help to soothe your soul with a fragrant candle or reed diffuser. Fill your bath with bubbles, dim the lights and you're ready for a soak.

DISPLAY SHELVING

Open storage should be a focus for displaying your prized possessions, from a favourite lotion or potion to a pretty potted plant. If you hanker after adding personality and pizzazz, it's time to experiment with display shelving.

BATHROOM 70NES

Luminaires chosen for use in bathrooms are subject to certain wiring regulations and must be selected and erected, so as to be suitable for the external influences likely to occur at the particular point of installation. Such influences are likely to include steam (leading to condensation), falling drops of water and sprays and/or jets from shower heads.

All luminaires can be assigned an IP (Ingress Protection) rating. This relates to the protection afforded by the light fitting against penetration by solid particles or moisture. The IP

rating consists of two numbers. The first number relates to the degree of protection against solid particles, the second to the degree of protection against moisture.

For bathroom use, the second number is the most significant. The required IP rating for light fittings in bathrooms depends on their actual location in the bathroom. The regulations divide the bathroom into zones (see illustration) which determine the IP rating. All luminaires used in a bathroom must be protected with a 30mA RCD, in accordance with IEE regulations.

ZONE 0

Interior of bathtub or shower tray - IP68 and low voltage supply (max 12v).

ZONE 1

Perimeter of bathtub or shower tray up to a height of 2.25m above the floor - IP44. Use IP65 where water jets are used for cleaning purposes.
